

ABDURAHMAN SAGER

Tripoli, Libya | (+218) 910125073 | abdurahmansager@gmail.com

PROFESSIONAL SUMMARY

Software Developer specializing in backend and full-stack development using C# and .NET technologies. Experienced in designing and building ERP-integrated systems, inventory management platforms, and reservation systems. Strong expertise in SQL Server, system architecture, and secure web application development using ASP.NET Core and Identity. Proven ability to analyze complex systems, implement scalable solutions, and deliver business-oriented applications that improve operational efficiency and data accuracy.

CORE SKILLS

Languages:	C#, SQL, JavaScript
Frameworks & Tech:	.NET Framework, ASP.NET Core MVC, Blazor, Entity Framework Core, Razor Views
Databases:	SQL Server, MySQL, PostgreSQL, SQLite
Architecture & Design:	MVC Pattern, Layered Architecture, SOLID Principles, Repository Pattern, Dependency Injection
Security:	ASP.NET Core Identity, Role-Based Access Control (RBAC)
Tools & Others:	Visual Studio 2022, AutoMapper, Crystal Reports, ERP Systems, System Design, Data Analysis

PROFESSIONAL EXPERIENCE

Software Developer

2025 – Present

AL-ELMIA Pharma — Tripoli, Libya

- Designed and developed an ERP-integrated reporting system to deliver structured business insights.
- Analyzed complex ERP database structures (300+ tables) and documented relationships and workflows.
- Developed optimized SQL Server stored procedures and views for high-performance reporting.
- Built user-friendly reporting interfaces using C# (.NET Framework) for non-technical users.
- Automated reporting processes, improving decision-making efficiency and reducing manual work.

Technologies: C#, .NET Framework, SQL Server

Software Developer

2024

Modo Luxury — Tripoli, Libya

- Engineered a full desktop business system for inventory, accounting, and production workflows.
- Designed relational database architecture using SQL Server with stored procedures and triggers.
- Integrated multiple modules into a unified system with automated financial reporting.
- Implemented validation, access control, and transaction integrity mechanisms.
- Delivered a scalable and maintainable enterprise-style solution.

Technologies: C#, .NET Framework, SQL Server

Freelance Software Developer

2024 – Present

Independent — Tripoli, Libya

- Developed real-world production systems for clients in business and healthcare sectors.
- Delivered custom web applications aligned with client operational needs and workflows.

KEY PROJECTS

Reservations Management Web Application

- Built a full-stack booking system using ASP.NET Core MVC (Razor Views).
- Implemented authentication and role-based authorization using ASP.NET Core Identity.
- Designed layered backend architecture (controllers, services, data access).
- Developed responsive UI to optimize booking workflows and user experience.
- Delivered a production-ready system improving reservation accuracy and efficiency.

Technologies: ASP.NET Core MVC, Razor, Identity, C#, .NET, JavaScript, HTML, CSS, SCSS

Inventory Management Web System (Healthcare Sector)

- Developed a web-based inventory system for clinics to manage stock and operations.
- Implemented secure authentication and role-based access control.
- Built backend logic to ensure inventory consistency and transaction reliability.
- Designed user-friendly interface for fast inventory operations.
- Delivered a system used to improve stock visibility and operational control.

Technologies: ASP.NET Core MVC, Razor, Identity, C#, .NET, JavaScript, HTML, CSS, SCSS

EDUCATION

Bachelor of Science in Software Engineering

2021 – Present

College of Electronic Technologies — Tripoli, Libya

CERTIFICATIONS & TRAINING

Professional Diploma in Software Development (Grade: 93%)

Al Mubarmaj Al Mohtaref

Advanced Diploma in ASP.NET Core MVC & Blazor (Ongoing)

Focus: Clean Architecture, APIs, Identity, Full-Stack Development

LANGUAGES

Arabic: Native

English: B2 (Reading, Writing, Basic Speaking)
